

ITEMS FOR YOUR NEW PROCURL HAREM KITTEN 2020

LITTER - Dr. Elsey's Precious Cat Silica litter - omits urine smell, has no dust, doesn't track and is flushable. www.petco.com Breeze - odor control, simple cleanup, anti-tracking, super absorbent pads prevent ammonia odor for 7 days guaranteed. Change pad weekly and pellets monthly. Best for one to two cats. www.petsmart.com

BOX - Use a large hooded box or box with a high rim to keep litter from scattering. Place a litter mat in front of the box entrance to minimize clean up. Purchase a good scoop with big holes and a dustpan for carrying CRYSTAL litter to the toilet. If you have a Trader Joes nearby, use their silica SPACE cat litter in the red bag. Cheaper and best on the market!

LITTER LINERS - Johnny Cat. Fits all boxes and is the thickest made for digging claws. Not necessary if using scoopable clumping litter as it stays in the box, which should be scrubbed out every few months with soap and water. If you have more than one cat, then it is best to clean litter box often.

WET FOOD - 3 oz. can of Pro Plan turkey, beef, or chicken. Feed 2X a day even after altered. If you prefer to change foods to your liking, then gradually mix in with Pro Plan over a week. This will help in omitting any loose stool. When your Curl likes something then stay with it because they are getting nutrition. NO MILK-loose stools will definitely result. No table or people food, just occasional fresh turkey or chicken is ok. Please use BOTTLED WATER if you are able. Intestines have to get used to new water. Don't worry about loose stools in the first week. www.proplan.com

DRY FOOD - "Fromm" is a great place to start. This brand is grain free with an assortment of meats and fish to choose from. Please visit this link www.petflow.com to read more about this brand and several others. We hope this will help you choose a quality brand of cat food for your new Curl. Along with dry please give wet food throughout your Curl's life. Giving dry only can cause urinary blockage. If you prefer to use another natural brand please mix in slowly over a week. Leave dry food down ALL DAY for a kitten next to a LARGE glass bowl of water and refresh it out daily. No plastic bowls ever for food.

TREATS - Offer freeze dried chicken from pet store (they LOVE this!!) Curls can be taught to fetch so, reinforce with treats and lots of "congratulations!" All Curls will learn easily if taught early. Be patient and do routine daily. www.chewy.com or www.google.com/shopping

NOTE: Put a 1/2 stick of REAL butter in a dish and leave it down all day for Curlie to lick when they feel like it. This will reduce shedding, produce shiny coats and is a great source of B vitamins and amino acids. A MUST all year and they will not gain weight.

EAR CLEANING - Epi-Otic Advanced Ear cleaner from Revival Pet Supply Item #17652740 \$15.99 www.revivalanimal.com Put the liquid on a Equate Baby Safety www.walmart.com . Glide the pointy tip gently UP the furrows of the ear from canal opening UP until ears looks clean. NOT into canal as it can push wax further down canals. Check ears every month OR when noticeably waxy. **NEVER** put liquids directly into Curl ears unless prescribed by a vet. Canals are somewhat narrow, and it is very uncomfortable for Curlie to shake out and could cause inner ear problems. NOTE: Sometimes there is yeast under the wax and is usually a result of not being able to properly clean the inner canals. This is regarded as FUNGAL since the ears are yeast producing and stenotic, and the canals are not straight. Call us if you have any questions or concerns.

COAT MANAGEMENT - Natural bristle brush for daily skin and fur management to help stimulate skin oils. Work occasional mats out with metal comb turned sideways and gently lift. They LOVE to be brushed. This will also help on shedding and will keep their coat silky and shiny.

NAIL CLIPPERS - CLIP TIPS ONLY - every 10 days or when needed. Ensures a happy relationship. www.revivalanimal.com #14609-795 \$9.99

How To Trim Your Cat's Nails – Please watch this video: <https://youtu.be/99PtaOQbBIY>

TOYS - Before kitten arrives a MUST HAVE would be a cat tree at least 5-6 ft. tall. Poles must have SISAL or ROPE because carpeted poles serve no purpose at all. Cats need resistance to strengthen their muscles genetically. Your new Curl kitten was trained on a cat tree with scratching posts and does not even know what scratching a couch is unless you do not have a tree for them. They must climb and scratch something so, get one!! This way everyone will be happy. Put feathered toys away after use. NEVER use string toys of any kind to play with because this can cause choking. Exercise is very important so, play with your new Curl daily -- like you have a choice...lol!! They love interaction.

CARRIERS FOR YOUR KITTEN: Try Amazon: www.amazon.com, www.amazon.com or www.sturdiproducts.com PLEASE call me with any questions, no matter how small. ENJOY your new Curl experience and you will say too, that these are not cats but a gift from Mother Nature's special recipes.
